

Andre Foreman

foreandr@gmail.com | foreandr.github.io

My background spans software engineering, mathematics, and high-performance team environments, which can be seen in more detail on my resume. I have built internal tools, automation systems, reporting workflows, and public-facing software, and I bring a practical, disciplined approach to the work I take on.

Beyond traditional employment experience, I have written roughly one hundred public applications, many of which are available through my portfolio and GitHub presence. Those projects have solved real problems for people and have generated approximately \$30,000 in revenue, which reflects both initiative and proven problem-solving ability.

I was also a national team athlete, which taught me how to perform under pressure, stay accountable to a team, and maintain a high standard every day. I would be glad to bring that same reliability, work ethic, and adaptability to your organization.

Thank you for your time and consideration. I would welcome the opportunity to speak further.

Sincerely,

Andre Foreman
